

Sumit Parise

Software Developer | .NET Full Stack Developer

✉ parisesumit86@gmail.com ☎ 7620792806 📍 Pune, Maharashtra

Career Objective

Full Stack .NET Developer with 2+ years of hands-on experience in **designing, developing, and deploying scalable, high-performance product-based applications**. Proven ability to build **robust backend systems and responsive frontends using .NET Core, SQL Server, ReactJS and RESTful APIs**. **Skilled in Microservices architecture, SQL/NoSQL databases, and CI/CD pipelines**. Eager to join a forward-thinking product team focused on delivering mission-critical enterprise solutions with innovation and quality.

Profile Summary

- - Results-oriented .NET Developer with over 2+ years of experience in designing, developing, and maintaining scalable web applications using ASP.NET MVC, C#, Web API, ADO.NET, and SQL Server. Proficient in object-oriented programming and backend logic, with solid understanding of SDLC and Agile methodologies.
- - Experienced in building and consuming RESTful APIs, writing optimized SQL queries, and working with relational databases. Skilled in implementing business logic, debugging complex issues, and enhancing application performance.
- - Comfortable collaborating with cross-functional teams and integrating frontend technologies like HTML, CSS, JavaScript, and jQuery into .NET-based solutions. Adept with tools such as Visual Studio, Git, and SSMS, and committed to writing clean, maintainable code that follows industry best practices.
- - Experienced in developing and integrating RESTful APIs using .NET Core, with working knowledge of Microservices architecture and inter-service communication.
- - Built secure login and access control mechanisms in ASP.NET Core using JWT tokens and OAuth authentication.
- - Familiar with tools and technologies including Hangfire, RabbitMQ, Firebase, Docker (basics), and logging frameworks.
- - Well-versed in Design Patterns like MVC, Singleton, Factory, Repository Pattern and DTO for scalable code architecture.

Professional Experience

Code Icons Technology

03/2023 – Present | Pune, India

Software Developer

Projects

Online Spot Management Application

Role: Backend Developer @ Code Icons Technology

Description:

A mobile application designed to manage spots of properties by integrating backend services and a responsive frontend interface. The application focused on scalability, security, and performance modules handling user management, data processing, and reporting.

Responsibilities:

- Developed and maintained **30+ RESTful API endpoints** using **.NET Core** and **SQL Server**, ensuring scalability and efficiency.
- Optimised **RESTful APIs** with **.NET Core** for seamless communication between frontend and backend.
- Designed and optimised **15+ SQL Server stored procedures** to process and validate survey forms, improving data accuracy and cutting processing time by 30%.

- Implemented **Repository Pattern and dependency injection** to enhance code maintainability and scalability.
- Improved **API response times by 20%** and **database query performance by 30% through query optimisation and caching strategies.**
- Performed thorough **API testing and debugging** using **Postman**, ensuring high reliability and quality.
- **Collaborated with cross-functional teams**, working on feature enhancements, bug fixing, performance optimisations and participated in Agile ceremonies.

Task Management Application

Role: Backend Developer @ Code Icons Technology

Description:

A mobile-based task management application designed to streamline employee productivity. It allows users to create, delete, and forward tasks to team leads, while also maintaining a clear task history for tracking progress and accountability. The app improves communication and task transparency within teams.

Responsibilities:

- Implemented **real-time notification using Firebase Cloud Messaging (FCM)** and **RabbitMQ** to ensure efficient and reliable communication between users.
- Applied **rate-limiting strategies** on Firebase to handle notification delivery effectively and avoid quota overuse.
- Optimised mobile application data retrieval by building efficient **stored procedures** and implementing **server-side pagination**, ensuring fast and scalable data loading.
- Contributed to the final phase of development, focusing on **bug fixes**, minor feature updates, and ensuring production readiness

Education

Masters In Computer Application

12/2021 – 07/2023 | Amravati, MH

H.V.P.M. Amravati

Percentage: 69.73 %

Bachelors Of Science

07/2018 – 06/2021 | Wardha, MH

Bajaj College Of Science, Wardha

Percentage:68.70 %

Skills

Programming & Backend Development

C#, NET Core, RESTful APIs.

Architecture & Messaging

Microservices Architecture, Clean Architecture, Apache Kafka, RabbitMQ, Event-Driven Design, API Gateway.

Frontend Development

HTML5, CSS3, JavaScript, ReactJS, Bootstrap, API Integration(Ajax, Axios,).

Version Control & CI/CD

Git, GitHub, Docker(basics) , Jenkins(basics)

Database & Persistence

RDBMS, SQL(MySQL, MSSQL), NoSQL (MongoDB), ORM(EF Core)

Security

Microsoft Identity (JWT, OAuth), Role-Based Authentication

Servers & Cloud Platform

Microsoft Azure(basics), Azure Data Studio.

Development Methodologies

Agile (Scrum), Code Reviews & Debugging, Design Pattern (MVC, Singleton, Factory, Repository)

Certificates

- Online Course in Full Stack Web development by Angela Yu • - Hacker Rank Certified in SQL
